

# Air Quality Forecast and Dispersion Outlook of Allegheny County, Pennsylvania for 3/30/2022

**Air Quality Forecast:** This is the daily forecasted Air Quality Index (AQI) for each area provided by the PA Department of Environmental Protection. The AQI is based on PM2.5 or Ozone, whichever is forecasted to be higher.

Forecast Period	Pittsburgh Area	Liberty-Clairton Area
<b>Today</b> Wednesday 3/30/22	PM2.5 <b>Moderate</b> 51 AQI	PM2.5 <b>Moderate</b> 53 AQI
<b>Tomorrow</b> Thursday 3/31/22	PM2.5 <b>Good</b> 38 AQI	PM2.5 <b>Good</b> 36 AQI

**Today's Forecast:** Much warmer air will stream into the area Wednesday with sunshine returning by the afternoon as winds turn into the south-southeast. PM2.5 will rise some Wednesday, perhaps into the moderate range as a moderate to strong inversion is likely during the morning, with better air quality occurring during the afternoon.

See Page 2 for the Air Quality Index guide

**ACHD Air Dispersion 36-Hour Forecast:** This is the dispersion forecast for Allegheny County starting from this morning through tomorrow afternoon. The atmospheric dispersion index is a rating of the atmosphere's ability to transport pollution away from its source and is based on emissions and weather. Better atmospheric dispersion can improve air quality.

Forecast Period		Atmospheric Dispersion Index	Surface Inversion Strength	Wind (dir, mph)
<b>Today</b> 	Morning	Poor – 8	Slight	ESE 7-8 to SE 8-9
	Afternoon	Generally Good – 46	--	SE 9-11
<b>Tonight</b> 	Evening	Poor – 12	--	SE 9-10 to SSE 10-11 Gust 20-21
	Overnight	Generally Poor – 18	--	S 11-14 Gust 21-28
<b>Tomorrow</b> 	Morning	Generally Good – 44	None	SSW 14-15 to SW 15-17 Gust 25-34
	Afternoon	Very Good - 136	--	SW 17-18 to W 11 Gust 21-35

See page 2 for the Atmospheric Dispersion Index guide and the daily Surface Temperature Inversion Report.

**ACHD Remarks:** Chance of rain this morning and rain likely tomorrow. Also, the sounding data from the National Weather Service was unavailable, so I had to use an alternative source.

Data provided by the National Weather Service (NWS) [Fire Weather Planning Forecast](#) and [PIT NWS Products](#)

## Guide to the Air Quality Index (AQI)

Color	Description	Meaning	AQI
Red	Unhealthy	Everyone should limit exertion outdoors.	151 - 200
Orange	Unhealthy for Sensitive Groups	Sensitive people should limit exertion outdoors.	101 - 150
Yellow	Moderate	Extremely sensitive people may wish to limit outdoor exertion.	51 - 100
Green	Good	No health impacts are expected in this range.	0 - 50

## Guide to the Atmospheric Dispersion Index

Very Poor	Poor	Generally Poor	Fair	Generally Good	Good	Very Good
1 - 6	7 - 12	13 - 20	21 - 40	41 - 60	61 - 100	> 100

### ACHD Surface Temperature Inversion Report:

*This is the 7 AM surface-based temperature inversion report for Allegheny County.*

This morning's surface inversion of ~0.59 °C with a depth of ~60 m is estimated to break at N/A. This surface inversion can be characterized as: None/ **Slight**/ Weak / Moderate / Strong.

No upper inversion starting below ~1000 m is reported.

### What does the Surface Temperature Inversion Report mean?

A surface temperature inversion is a weather pattern that stops mixing of the air near the ground, and pollution released into the air tends to remain at higher concentrations.

Surface temperature inversion conditions include how strong the surface inversion is (in °C), how high the inversion is above the surface (in meters), and when the inversion is expected to break (in Eastern Standard Time). Also included is whether an upper-level inversion or inversions exist, starting at about 1,000 meters.

#### Surface Temperature Inversion Characterization

- 0-0.9 C°: Slight
- 1-2.9 C°: Weak
- 3-4.9 C°: Moderate
- ≥5 C°: Strong
